

Planning

Invest in a premium technology and maximize your yield by protecting the value of your purchases against strong price movements in the growing season.

Nutrition Planting

Make more with less by planning and executing the planting stage with a digital tool that creates precise variable rate applications.

Monitoring & Protection

A digital tool that enhances agronomic decision-making by turning field data into meaningful insights.

Harvest

Monitor all your fields in one place and get real-time updates with immediate notifications. Track changes offline and work from anywhere in the world.
